

Creating a custom visual representation of your business, product or service requires a delicate balance of art, skill, experience and technology. At KM Entertainment, that's our specialty. We use Canon digital video (HDD) cameras. Our non-linear HD production suite is based around the Adobe CC Premium suite, one of the video industry's most powerful desktop-based editing systems.

All video is edited with Adobe Premier Pro CC, After Effects CC and Photoshop CC with Red Giant Magic Bullet Suite, for professional color grading. All of our audio is produced with Presonus Studio One 3, Avid Pro Tools and Apple Logic Pro. We also have acclaimed instruments, professional effects, and expanded sound libraries and we have a large collection of custom plugins.

What does this mean to you and your production? It means that - from the time the first image enters the camera's lens to the time the production is finished, you get top quality. Every project is unique to us – regardless of the platform.

*KM Entertainment is a Digital Branding Agency based in Nashville, TN that provides Digital Distribution and Music Branding. We provide the sonic character to visual stories - original music and sound design for films, commercials, games, interactive presentations, and websites. In fact, we also provide the visual design itself. Our skills go far beyond music and SFX - they also include mobile device development, graphic design, animation, websites, and motion graphics.*
