2018**

I have over 25 years experience in performing voiceovers for a wide variety of corporate videos and non-profit organizations.

Many are still in use within both the private and public sectors for domestic USA and international audiences.

Several corporate training videos that I wrote, produced, and voiced for a number of corporate clients are also still in use.

Although the vast majority of my VO materials are proprietary to my clients; there are a few that are available for public viewing. Those are accessed via my Backstage Profile:
